CV50-20 Check Valve, High Pressure

SYMBOLS

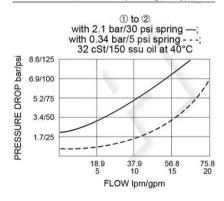

USASI:

PERFORMANCE (Cartridge Only)

DESCRIPTION

A screw-in, cartridge-style, hydraulic check valve for use as a blocking or load-holding device for high pressure applications.

OPERATION

The **CV50-20** allows flow passage from ① to ②, while normally blocking oil flow in the opposite direction.

The cartridge has a fully guided check which is spring-biased closed until sufficient pressure is applied at ① to open to ②.

FEATURES

- · Hardened seat for long life and low leakage.
- · Optional bias springs for back-pressure application flexibility.
- · Fully guided check assembly.
- · Industry common cavity.
